

A dreamtour from South Germany to the north of Italy, over gravel, on old paths or over lonely passes, surounded by a breathtaking landscape. Ulrich Stanciu, founder and longterm chief editor of europe`s biggest moutain bike magazine BIKE.
presents 18 unique crossings in the central alps. Impressive photography and detailed descriptions document this unique and incredible region. An important element of the book is the added CD-ROM, that alowes the reader to create and print a personel roadbook with elevation profile out of 638 sections (9252 km and 295.214hm overall). New is a daily stage planer and a tour-ratingsystem. A detailed service part gives tips for scheduling, planing, equipment and behavior during the tour.

Almost no other mountain in the alps offers such a glorious scenery for bike tours than the Grossglockner, the highest peak in austria. This bike area extends from the arktic appering region of Hohen Tauern to the almost mediteranean climate around the Millstätter Lake. It offers not only 38 excellent daily tours but also perfekt connections over Glockner- and Draura-bike path for a longer bike holiday. All 38 tours are also available on CD-ROM. The program searches the ideal tour for you and gives you your suggested astimated tour time. The roadbook with all tour datas and elevation profiles is available to print and makes it easy to simulate each tour precisely. Faszinating innovation: you can follow every tour virtually in 3D-movies and contemplate the detailed touring in bird`s eye view.
Price: €9,80

This book presents you the most beautiful mountainbike tours in one of the most awesome bike regions of the alps, the Trentino Dolomites. Breathtaking photography shows you the fantastic landscapes of the different routes, detailed textes describe the characters of the tours, define the target group and the level of difficulty, tell historical backgrounds and human anecdotes. Precise profiles give information about elevation and terrain conditions. 3D satellite imagery show the route characteristics in a real photo of the earth. Exciting: the 6 days Dolomites round trip. The clou of this book is the interaktive CD-ROM, where all 41 routes are available. The program searches the ideal tour for you and gives you your suggested astimated tour time. The road book with all tour datas and elevation profiles is available to print and makes it easy to simulate each route precisely. Faszinating innovation: 3D movies allow you to fly over each tour. Price: €9,80
